Type: WORKSHOP REPORT		Ref. No.: R27	
Client: Forum for Research into Ice Shelf Processes (FRISP)		Prosjekt/Project no.: 108320	Coordinator: Adrian Jenkins (chairman)
Routine:		Project period:	
Controlled by:		 Approved by: Eystein Jansen Date: 17. October	
Date:			
Date: 16. November 2006	No. Pages 178 pp	Availability: Open	
Title: FRISP Report No 14 (2006) Citation: FRISP Report No 14 (2006). Edited by Lars H. Smedsrud, Report Series from the Bjerknes Centre for Climate Research, Nr. R27			
Editor: Lars H. Smedsrud			
Summary:			
<p>The 15 th and 16th International Workshop of the Forum for Research on Ice Shelf Processes (FRISP) gathered in total 26 different participants from Australia, Germany, Norway, and the United Kingdom. This report contains the submitted reports after the two meetings. We thank Hans Oerter, Alfred Wegener Institute, for acting as the chairman since 1999, and for all the effort he has done with publishing the previous FRISP reports 1-13. After the meetings the decision was made to include papers from the 2000 and 2002 workshops in this FRISP report No 14, and while it has been slow process, it is good to finally see it through now in 2006.</p> <p>The 2002 meeting saw the first visits of our Australian colleagues, thus this report contains activities from the Amery ice shelf, along the lines of FRISP is now being a more general forum covering activity on Antarctic Ice Shelves in general.</p> <p>Adrian Jenkins was elected as the new chairman, and Lars H. Smedsrud as a new editor of the reports/www pages. The Bjerknes Center for Climate Research (BCCR) was established in Bergen in 2002, and has taken over after AWI in hosting the www pages, and printing reports.</p>
